Aspiring software developer building applications in Java, Python, and C++, applying data structures, OOP, and DBMS fundamentals across independent projects — an AI-powered learning platform and a network traffic analyzer — while developing web development skills in HTML, CSS, JavaScript, and React.

SKILLS

Programming: Java, Python, C++, Data Structures and Algorithms (DSA), OOPs, OS, DBMS, SQL, HTML, CSS, JavaScript, React, System Design

Tools: Git, Version Control, AI Tools, Prompt Engineering

Content: Content Writing, Ideation, Research

Soft Skills: Teamwork, Problem-solving, Adaptability, Communication

EDUCATION

Bachelor of Computer Science — IES IPS Academy *Expected 2027*

Higher Secondary — St. Mary's Co-Ed School *2021 – 2023*

EXPERIENCE / INTERNSHIPS

Web Developer Intern | Boltly Electric

- Worked on the frontend to improve and optimize the company website during a one-month internship at Boltly Electric (May 20 – June 19, 2026).

PROJECTS

Data Sip — AI-Powered Learning Platform | Java, Python, HTML, CSS, JavaScript

- Built an AI-powered learning platform that adapts to individual student needs, using data science techniques to predict performance and personalize learning paths.

Packet Analyzer | C++ | Deep Packet Inspection

- Built a network traffic analyzer using Deep Packet Inspection to parse PCAP files, identify applications, and filter packets, adding multithreading to process traffic efficiently.

COURSES & CERTIFICATIONS

Java Programming for Complete Beginners *March 2025*

- Completed a 42-hour course covering core Java, object-oriented programming, exception handling, file operations, and collections, through hands-on coding exercises and projects. (Certificate link)
